```
<div class="YTvids">
<iframe width ="450px" height="230px" src="https://www.youtube.com/embed/Jgw0zsfFt7g" frameborder="0"></iframe>
<iframe width ="450px" height="230px"  src="https://www.youtube.com/embed/jy3Eb5gwAL4" frameborder="0"></iframe>
<iframe width ="450px" height="230px"  src="https://www.youtube.com/embed/ch44pzXammg" frameborder="0"></iframe>
</div>
</div>
```

<video> for Local Video:

The <video> tag is used to embed video content directly into the page.

The width and height attributes set the dimensions of the video player.

The <source> element provides the path to the local video file and specifies the video format using the type attribute.

The controls attribute adds playback controls to the video player.

The text inside the <video> tag is displayed if the browser doesn't support the <video> element.

```
<video autoplay loop muted plays-inline class="back-video">
    <source src="images/backgroundvid.mp4" type="video/mp4">
</video>
```

<iframe> for Online Video:

The <iframe> tag is used to embed content from another source, in this case, a video from YouTube.

Adjust the width and height attributes to set the dimensions of the embedded video.

The src attribute contains the embed URL of the YouTube video.
